## Detachable front panel

With the optional remote control kit, RMK-3 and separation cable, the front panel of the radio can be detached from the main unit. It allows you flexible installation even in limited installation space.

## Dot matrix, multi-function LCD

With a high contrast dot matrix display, upper and lower case characters can be easily distinguished. You can change the display setting to show one line and 12 characters, or two lines and 24 characters via programming. LCD backlighting is standard.

Two line setting display example.

## Front mounted speaker

4 watts (typ.) front mounted speaker delivers clear and loud audio. The built-in audio compander improves the signal to noise ratio.

## IP54 dust-protection and splash resistance (Controller only)

The rugged die-cast chassis and polycarbonate front panel are resistant to shock and vibration. When used with the optional separation kit, the remote control head has dust-protection and splash resistant construction, equivalent to IP54.

## Basic LTR/Conventional mode operation

Both conventional and LTR mode channels are programmable in a radio. MDC signaling is also available on LTR mode.

## Multiple 2-Tone, 5-Tone signalings

The built-in 2-Tone and 5-Tone capabilities allow you to send a tone code with your call and decode multiple tone codes on a channel. 40 pairs of CTCSS/DTCS memory channels are also available.

## MDC 1200 compatible

The following selective calling and ANI

features are available with the built-in MDC 1200 signaling.

- PTT ID
- Radio check
- Caller ID
- Emergency, emergency mic monitoring
- Selective call
- Radio stun/revive
- 500 Aliases
- Status/message
- Call alert
- Call log

## BIIS 1200 compatible

The following selective calling and data features are available with the built-in BIIS system.

- 32 abbreviated call memories
- 7 group IDs
- 24-status Messages
- Send 12-character SDM (Short Data Message)
- Receive up to 95 characters of text

## Mode slave scan

In the normal mode scan, you can select a scanning list independent to the channel setting. In the mode slave setting, the scanning list is automatically selected according to the operating channel. It is convenient when you change operating channels or move to a different operating area, you don't need to change the scanning setting.

## Voting scan

The voting scan detects the S-meter level of repeater stations and automatically selects the strongest station or the first station to exceed the preset S-meter level, useful for roaming between two or more repeater sites.

## Wide frequency range and large channel capacity

The IC-F5063 series covers a wide frequency range in one version (VHF 136-174MHz, UHF 400-470 or 450-520MHz). The 512 memory channel capacity with 128 zones allows you to divide and store a variety of flexible channel groupings.

## Built-in inversion-type voice scrambler

The built-in inversion type voice scrambler provides secure conversation. When a more secure system is required, the

32 code non-rolling-type voice scrambler UT-109R and 1020 code rolling type UT-110R are available as an option.

## D-sub accessory connector

The IC-F5063 series has a D-SUB 25 pin ACC connector for connecting various external devices.

## Other features
